REPORT OF SCHOOL BOARD.

The board of education believe that the schools for the past year have been fairly successful and would probably compare favorably with the average country school, but there is still room for much improvement.

We would suggest the addition to the schoolrooms of suitable maps, charts, globes and dictionaries which would greatly assist the teachers and render the studies more interesting for the pupils.

The school board do not wish to criticise harshly either parents or pupils, but a gentle reminder in regard to irregular and non-attendance seems needed. The average person does not realize how much a child loses by absence from school even one day, and when this extends to days and weeks the loss is indeed great. It should be the first duty of all parents to see that their children attend school regularly unless prevented by actual sickness or inclement weather.

We all know that a good education is a very important factor in a person's life. Without it he labors at a great disadvantage. The country school has always been a strong foundation for education and success. Let us therefore labor and even sacrifice that our children may attend these schools and derive the benefit which is sure if parents and pupils will co-operate with the teachers and board of education.

Estimate of expenses for the following items for ensuing year:

Tuition for high school scholars,	\$150
Text-books and supplies,	75

Respectfully submitted,
